Professional Summary

High-honors Computer Engineering graduate from Boğaziçi University working across security engineering, full-stack development, and machine learning research. Experience in production security monitoring, cloud infrastructure, and rigorous evaluation of security-alert prioritization models.

Work Experience

Member of Technical Staff — **MicroAGI**
Istanbul, Turkey — *September 2026 - Present*

Database Student Assistant (CMPE 321) — **Boğaziçi University**
Istanbul, Turkey — *February 2026 - June 2026*

- Designed, administered, and graded relational database projects (TransferDB) for 54 student groups; conducted live demonstrations assessing backend logic, triggers, and stored procedures.
- Security-tested student web applications with SQL injection payloads to verify input sanitization and parameterized queries.

Cybersecurity & Software Engineering Intern — **Doğuş Teknoloji**
Istanbul, Turkey — *June 2025 - August 2025*

- Reconciled 200+ log sources across seven business units in IBM QRadar, coordinating WinCollect onboarding, tenant mapping, and correction of misclassified Windows sources.
- Developed MITRE ATT&CK-aligned detection rules and updated 300+ security reports using AQL and regex; investigated phishing, DDoS, and malware alerts with Defender and Cortex XSOAR.
- Engineering rotations: containerized Apache Airflow DAGs and developed Spring Boot/Kotlin backend services using JWT authentication and Redis.

DevOps Intern — **Hepsiburada**
Istanbul, Turkey — *June 2024 - August 2024*

- Provisioned and managed production Kubernetes clusters across zones using Terraform, Ansible, and Kubespray; configured node scaling, taints, and tolerations.
- Automated GitLab CI pipelines and branch-protection workflows; integrated HashiCorp Vault for secrets management.

Academic Research & Projects

Reducing Alert Fatigue in Multi-SIEM Environments — **Boğaziçi University**
Lead Researcher; advisor: Prof. Fatih Alagöz — *2025 - 2026*

- Implemented AlertGraph, a heterogeneous GNN + LSTM pipeline combining Wazuh, Suricata, and AMiner alerts for security-alert prioritization.
- Identified evaluation leakage and rebuilt experiments with chronological splits, no-message-passing and rewired-edge controls, and scenario-level inference.
- Preparing a manuscript on benchmark limitations and evaluation validity; corrected experiments did not establish a benefit from graph message passing.

Education

Bachelor of Science, Computer Engineering — **Boğaziçi University**
Istanbul, Turkey — *June 2026*

- GPA: 3.64/4.00 (High Honor); final semester: 4.00/4.00.
- AA in Machine Learning and master's-level Deep Learning.
- Exchange: Computer Science, Hong Kong University of Science and Technology, Fall 2024.

Skills

Technical Skills Python • PyTorch • Kotlin • TypeScript • SQL • Linux • Java • C
Languages Turkish (Native) • English (C2, TOEFL iBT 6.0/6) • German (A2) • Spanish (A1)

Certifications

ISC2 Certified in Cybersecurity (CC) • Google Cybersecurity Professional • IBM Cybersecurity Analyst • IBM Ethical Hacking • IBM QRadar SIEM Foundation
AWS Data Analytics • UC San Diego Intro to Big Data • Northeastern Univ. Data Privacy

Honors & Awards

Grand Prize Winner – *Kim Milyoner Olmak İster?* (Turkey's "Who Wants To Be a Millionaire"), 2024
